

Research Plan

Nicholas A Potter

March 31, 2017

My research interests are motivated by a few underlying interests: scarcity and its impacts, the importance of causal inference in research generally, but especially in providing actual information about complex systems like economics, technology and the implications of ubiquitous data, development economics, and collaborative communities like open source and reproducible research efforts.

Statistical Validity, Reproducible Research

Competition

Econometric Theory and Machine Learning

Economics of Water and Other Scarcities

Collaborative Economies

fall into several broad categories: economics of scarcity (both natural resources like water, and behavioral resources like cognitive ability); international development

R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

```
summary(cars)
```

```
##      speed      dist
##  Min.   : 4.0    Min.   :  2.00
##  1st Qu.:12.0    1st Qu.: 26.00
##  Median :15.0    Median : 36.00
##  Mean   :15.4    Mean    : 42.98
##  3rd Qu.:19.0    3rd Qu.: 56.00
##  Max.   :25.0    Max.    :120.00
```

Including Plots

You can also embed plots, for example:

Note that the `echo = FALSE` parameter was added to the code chunk to prevent printing of the R code that generated the plot.
